D I N O S A U R

by Honiker's book

You've finally arrived in a circumstance rid of sense, or reason; your round planet, and in this reality, it's fairly safe to say you could, never see, a dinosaur, save that perhaps words like you've found here, could reach you, or your children, and seek about a work built on understanding, of culture, and what that makes a species into, a race, into, or set of species, a set of races, a culture of diversity, spanning across lives, and not bound, and anyone who says, spanning across borders, is sick with the idea of it, surely so, for borders were only ever in the mind, and still in his cause for freedom,

somehow, he implants in you that borders are forever, and to be noted, and known, surely even in the face of culture.

Have you seen **WIKIPEDIA**? You should be scared, at just what the only source, will give your child, on a **dinosaur**...

Changed motion over borne in these for hours taken over in this in our, planetside, this world, this life, surely on, in for, here, forever, that if could you know, this side over inside and out, I could take you to an ancient dialect, past the borders built into your imagination, for language, so you can see what it has always been; this expression of our kung fu au lu, and surely in, that you could believe animalia were living something of a different life, to yours, and on in against these worlds, this lifetime taken

on in before these worlds, in our lives, this beside our understanding taken on against this world in war, this living out to know, this living out to scare us all. That we could be scared, of things like wikipedia, swallowing up all the literature and guesswork, about the dinosaur, and believe what in here still this broken internet source, this bereft of freedom to use some computer from ages of stone and marrow, this life, surely over inside these lives, did you know, that if a boy lived on a dinosaur island, with an old computer, he could still build a website for you, to tell you about this secret wonderland he's found, and what he really knows about dinosaur, and you'd, never, find his website on google.

Chapter 1, What I Know about Dinosaur

It's like you couldn't forget, that I'm not from the same places as you, but I know about life, and these worlds in ours, sure, for something about kanji, and I wanted to teach you about dinosaur like they're kanji, something different, in spirit, and there's metal and wood in the heart, sure, the hearts of these beasts, and you can swim with the frogs, and get high off the life in their, that mixes in with the water, this surest sex in high, this world over, and they wanted to teach you something else about the dinosaur, and maybe there's something to be learned about broken language, in your encyclopedias, but anybody who told you you'd never see a dinosaur, didn't want you to sail far enough, or fly far enough, and

nobody thought, that Amelia, just kept going? That the world wasn't round here at all, and like, I could lie about life, but this is just a book, so you don't have to believe anything about it, or me, and maybe just enjoy the good stories, about, culture, that makes people, and I know lots about kung fu, but, so do people I know, dinosaurs, I know, they live and breathe, and reshape each other and this world we're in, but like, just believe at least that what, I can find dinosaur bones? This is really hard for me, to write in these straight lines, for your different land, but let me poem, for a while, and maybe you can see where I come from in this greatness of beast in these worlds unbound by borders in any at all in these worlds over, this life, surely these worlds, in my living outwards

this beside me, here, that this world in ours
for more to know, you could know about
these lives in ours to know about this world
in this for knowing surely more or less
before, this in grace for more to know in
ours, this living on in outwards for this life
in here to know, and if you didn't know,
these are thought patterns, that form the
dinosaurs' bodies, like all our kung fu shapes
our bodies, sure enough, and you can't tell
me I'm not a scientist, from a different
country, so go to hell, this book is called
Dinosaur, and I'll spell the rest how I want...

I could lie about a moment here in time,
this life, surely on in before this world, here
to watch with you, but this in ours for more
to know, that this world inside my living out
to know about this life, surely over these

before my own, this inside my only living
out, to know about this living out to know
about this in life, surely over inside my only
life that this was gone before, these worlds,
this inside my living out to know about, this
grace, this living out to know about this
world with God, this life inside ours to know
on in before these worlds, this living out to
trek the moldes we knew before, this living
out to know in ours, this living on in mine
before, this in life, surely granted, backwards
on in before my living out to know about
this world in ours before this granting out to
know about this world in my knowing ever
more, this life inside my own so shadow it so
please, this living out to know about my
world in this old standing out in pattern set
back on in mold, this life in ours before to

break it all in this one hold of ancient ways
about us all in this before, this life surely on
in before this life in my own grace...

Chapter 2, 黒Black

You're crazy, do you know what the tyrannosaurus rex looks like? What that word, means? He doesn't look like something retarded, he looks like the king of dinosaur; anatomically perfect, deadly, cool, beautiful, scary, strange, unheard of, impossible, alien, foreign, ancient, primal, order'd, taken, sure, back, black, and this world over, he could be any kid, like any size, but you see his spirit, this surest kanji, and I've never seen one with little arms, but this spirit could be in something small, because king, for primal orders, like the saurians, doesn't mean what king means, for anyone else, even Arthur, I'd say, he's something different, but these animals, these perfect not creatures? I don't know, if you know what they do in their

lives, maybe you could believe, that lions don't want you seeing, what they do, with their kung fu au lu, that makes them into lions; it would be sharing dangerous technology with idiot alien peasants and documentarian peasant killers, this world over, this life, in beside us here in these worlds, so like, drop a zebra carcass, and see if they lounge all day, and if the king lion doesn't leave because like, you're perving out on his family all day?

This world, taken surely on in before these worlds, I could have myself, stood beside a tyrannosaurus, and you'd say, this perfect little boy, with a body build for what he wants, is more anatomically similar to this lion king, than this fat guy we call another homosapien. Really, I'm a lot closer

to the lion, and it's stupid that I have to say kanji, and spirit, to get you to remember, the spirit is what we are, but only in church, did you get taught it was something that could be taken away from you, over in, these worlds, ever set against, in locking forthe this quarter up and enjoy your damnation here, and hope we're just wrong about your eternal soul, because it sounds like we are, but you know we *could* make hell on earth for you, if you stray, so,... don't.

The **T-Rex**... Dif'rent, sure, scary, broken not, aware, this side, apathy, not, Taaaken, this life, suure, sure, sure, okay, back, once, inside, this life, surely sewn, this life, over in, these worlds, this life, sure so know, this world, this life inside our own, this, Life! This, sting! This, world, this whipLash! This,

life, surely forever on in against these worlds, here forever taken on in against this world in ours before this once in my own life, this world, taken on in against my cause inside these worlds before, this living out to know in God, this world in ours, this living out to know this spirit of the King...

Think of the spirit, of the word, for a primal order king, when you behold a dinosaur, in your imagination, and seing, about what he means, sing it, out, and see if the dinosaur looks to you, and if he doesn't, he's some, whatever, this side, over inside this world in ours before, this motion in my own, this living out in our know, this world, taken on in before this world, this life in my own song, this one world, this living out in ours to know about this golden course, this

life, surely over on in before, this life, surely on in before my living out to know about this world, this living out, to know about this one world, this living in ours to know about this in gold, this living in ours, to know about this harmony taken, so like, think about the kanji, for golden, and what it has to do with black, which is plenty, but black in kanji, too, and when you use words like black, instead of signs like 黒, we just call them *scripture*, instead of *kanji*.

So if you understand black黒, like on a black belt, you know that unlike white, which will just get blemished or if it's always bleached out, just hurt your eyes, in black黒, you can't really blemish it, and there's infinitely deeper shades of true black, once you're there, so you're looking deeper,

deeper into it, and one black could be infinitely deeper than another, and that's what tyrannosaurus rex look like; that you see one, but it's black黒, so, unblemished, but one could look way more black, way more incredible, than another, see? Once you're a black belt, like in karate, you could be, ten times as dangerous as this other black belt, over here, and that's what it means to be black, or to be a king of dinosaur, and make no mistake, they know way too much kung fu to not get called black belts by anybody still practicing karate, for goodness saken.

This life, surely surrounded, this life in style, this world, over surrounding, this life, surely this life surely on in before these worlds in my knowing over inside on in this life for these worlds in this knowing of this

planet here, on in before this life, sure sewn
back on in before, this world war this, life, in
ours, for, this song, this, world, this living,
out to know about, this life, this world, this
living out to know about, that I know what
evil dinosaur look like, and like, I'd call
something evil a *wrex*, if I wanted, to
let you know it was dangerous, but the king
of dinosaur, the true black dinosaur, aren't
like that; they're something glorious to
behold, and I don't go in much for what
idiots at your school say is hot; I know what
beauty is, and I know you actually can't
build a beautiful body for yourself, if you're
evil, and like, I've seen patchwork dinosaurs,
before; I kill them like I kill mockingbirds;
often and all the time, in the name of love
and friendship. I don't always read books

from far away, but like, if you have a bird that just makes pretty music all day, and you're not enjoying it, it's not pretty music, that bird is probably just mocking you, and you should kill it, because everybody knows mockingbirds kill your baby birds and lay their departed in the nests to be nursed up by fucked up parent birds, or, maybe, they just take the next open nest they thought they were feeding into?

This world in ours for fading knowing, that this was granted on in for these worlds taken on in after these worlds in our chapters, this life, surely so we know this golden grant in black for, this life, these worlds in my chapters, this here in ours for this, world in my living out to know about these worlds in ours for, so like, gold, has a

lot to do with black, still, and you could know about that, but more like I wanted to tell you, that kanji are always connected to other kanji, in their spirit, their knowing of, and gold is a lot like black, so know this in royalty; this in value, of primal ordering, this life in styling over for this in forever more, this world, in ours, to know, this life inside, my know, this living out, and know that if you found a black belt martial artists, he wouldn't have to be wearing black, to be black, himself, and that means, he knows kung fu, and you have to look ever deeper, and know what he looks like, in reality, and if you're only looking for creatures that COULD rip you apart, then yeah, a dinosaur of any walk but two, or something, could scare you, lots, but the rex I know, aren't

evil, and I love dinosaur, and I kill mockingbirds, who go about in sick grays, and tell you it's the same thing, the same thing, and if someone's not bleaching their whites, or sickening all the colors in the area, nobody could even notice, until the tyrannosaurus wrex comes along, in true black, to set your references, and rend... something...

This one world, this life in my own standing, this living out to know about this score, this living out to know about these worlds in ours before this in living on to know about this world in ours for more to know about this living out to know about this world in ours before this in standing out to know about this God, this world in ours, this living for more, this living out to know

about Gaud, this life in ours, before this standing in, this living out to know about, this world, but like, if nobody's bleaching your skin, it isn't white, so, take you colors back, and know these various shades, surely on in before, and my dinosaur friends would tell me I have gold skin, but like, it's just normal boy skin, and you'd call me white, maybe, if you wanted to upset me, because I'm a black belt, I'm pretty sure, and my skin is gold colored, and there's more to see in it, but if you told people it was white, they'd think, that stings, and look away from me...

Chapter 3, Something Different

This side over inside over under this world in ours for this in knowing more to know about this world in ours, this inside my life before, this life, surely over, that I could know, about a bronteosaurus, and if you've never met one, it's that their name, is anything a kid knows them by, every little accent, everything you could add to it, brontosaur, brontiosaurus, brontiosauro, this life, surely over in these worlds, this surrounding this life, surely over in this life, surely over more for in these worlds, and this creature, could be something there in on akin to a god of the forest, and this life in its own design, that it needs not, feed, on endless gallons and gallons of plantlife, but builds trails, and sets apart this life, for that,

and changes this riverside, into that lake, this surest form, that world over, these lives, in on in and surrounding, this life over with and on in these worlds, this life, surely over inside under this world, this inside my little living here on in before these worlds, that you could know nothing of life lived in feudal circumstance, or a primal not origin, that this was some creature of alien origin, could be known about, but on in changing course, for sure harken back, and behold, the coming of *Littlefoot*, and witness, this surest remark, that he could be followed by a trail of child kin, all different walks and patterns in kung fu, that he could usher in this greatest change, and always did, and like, seeing a *Littlefoot*, little forest friend, was like watching a baby forest gaud show up, on

mark, wherever you were, and you'd crane
tu here and about, looking for some way, to
spot the rest of them; these forest gauds, this
plains not animal, this changer in resonance
and patterns all, that this surface forth and
in, trees grow higher, taller up, as they pull
apart lower branches through surest
forestways, and with no one scraping away
the leaves, there at the tree bases, they can
build hills for themselves, and natural
mountains of soil, and parch.

This surest forming on in for, this world,
this in my life, this world, this in ours, this
living out to know, about these worlds in my
life, this world, this living out to know about
God, this life in ours, this beyond, this living
out for more, this pattern on in for this in
kung fu, this for dinosaur in God, this life in

ours for, this little song in our part, this world in love, this life, surely known about in these lives, that I couldn't know, that a dinosaur, a brontiosaur, would scorn you, for telling that child he couldn't call him bronta, or something uv in for this life against, these worlds over more surely in it for, this life, surely for, this one world, this little life, forever on in, before this life, surely on, in before this in life, surely over more sure too, this was never, taken surely on in before, this one world, this before, this one world, taken on, in for this kind of love, this in ours, this life, surely, brought, back on about, this inside our own love of all this life, this in Sex, surely here in for God, this life in my living out to know about this world, in ours!

That this could be known, Littlefoot is

always a little, brontiosaur, they say, who plays with all other children all day, so like, if you don't think littlefoot would play with your little monster, it's probably literally a monster, because Littlefoot loves his son, the tyranosaurus rex, chomper, but like, everybody in some worlds thinks you should leave children to monsters, so maybe you didn't know that part, but good dinosaur take care of other dinosaur they wants to, you know?

That we could know about these worlds over inside of this life, surely on in for this world, this in living ever on for, this world, this in ours for life, this world in ours, this living in for this in once before, this in light in my life, this world, remember, this is the life of a brontiosaur, and he can change this

whole world with his step and knows, in
God up above and this soil below, in this,
planetside, this world inside ours this life in
my name, this life, this living out inside ours,
and I don't know what you know about the
kanji for planet, but, I feel like, it couldn't be
complete without dinosaurs. This in ours
before this world over this inside my living
out to know about this world in ours before
this living out inside my only life in ours for
this in mine before, this world in ours, this
life in before in this living, out to know,
about this only world, this in living it out, in
mine before, this world in my world, this
young life in ours, before this world in ours
before my life in my own scope so know in
this breathe of kung fu, that regard, this in
ours, this rivers to lakes, this in our, design,

this bronteosaurus power, this world over into these worlds before, this in ours before this living, this truest form, this forest gaud, this life, surely over inside this pattern taken over in these worlds over this in living out to know about this living here enchanted this in angels this living out to know about this world this living out in ours to once know, this life, surely on in before this in life on before this in ours, this life, surely, over in ours, this in living out to know about this old chapter, this beside me this in my life, this was my own surest course in ours before this one world, this in life, so like, if you couldn't tell, the legends about Littlefoot and Chomper are pretty important to a lot of people, the Brontesaurus, with his son the King.

This life inside of ours before this world in ours to know about this living out to know in ours before, I'm going to warn you, actually, about the next chapter of this book, it's called, crocodiles, and like, it's really sick, and you shouldn't believe that something like that could ever be anything but a monster, crocodile means monster, in a certain form, only, that sickened body, this world over in this monstrous intent, so like, take a breathe of life, in that of a soul like Chomper, kept well away from the nasty jaws of evil dinosaur, and breathe this world taken over out in under this world in ours before this living out in ours to know about this ancient course in and on in back against this world in ours to know about this world in ours before this living out to know about

this world, there's like, Dinosaur we just call, swimmers, and that's in all the stories, because everybody knows there's all kinds of different swimmers, and you like, just know they reshape riverbeds and build cool mud things, and change, this plantlife, over this one rivergrass, this life, surely over in and on in against t his life, and they'll follow a Littlefoot herd, because like, the parents actually just, find, kids, to take care of, and they keep finding them, because it's impossible to live in some house like a heathen, you live everywhere, so like, the Littlefoot dinosaurs, who play with all the different children, herald in great change, as the families swirl in about their den, this newest form in life, this world over in for these worlds, that swimmers come in all

kinds, and like, colors, too, and I like the red ones a lot, the ones I know, anyway, they have like, muddy skin, but red spots, or like, speckled red and brown, and like watching you like you're a trippy little, alien, what, are you, doing, way out here?

Did someone lose you? That's, not, something, I know, anything about, by, then they usually splash off, cuz I'm a freaky alien, and like, I couldn't tell you about all the crazy conversations I have with dinosaur, unless you wanted to start understanding all the poetry I give about 'em, because that's like, how they breathe, animals breathe in onomatopoeia, do you understand? All life, breathes in aunomanopeia, they do, they think, in words, literally, and breathe, that, through

their form; *wonder what, this for, this'inLife, this, world for, this, surest surrounding, this course, inside, here? Ah, no for, this in, surest score*, That animals don't sing? Are you crazy? It's not even called a real bird, if it doesn't sing; just a mockingbird, or parrot.

No parrots aren't real birds, you fucking idiot, they have no idea why you're so obsessed with what a bird does and doesn't do, does, doesn't, do does, do does, or, does over, more for? This for, back, for, in, for, this for? Haha, this for! This for! Haha, this for!

Just shut up, mockingbird, I will rock you...
Rocks, work great, strangling,,is,,Better!

This one world in ours for standing, I'm not sure why you're so stupid, as to think, my dinosaur book, would never talk about,

dragons....

This life surely over on, but like, not the beast dragons, not yet, anyway, they're like, dinosaurs, for sure, but there's dragons in the rivers, the tsunami, I'm pretty sure, but there are rivers in the ocean called currents, and the rivers in the earth, the soil, and in the air and water in the sky, there, are all rivers, this dragon in, this life in ours before, this world, surely on in before this world in life, this, life, surely on in before this world in standing for, this life, surely on in before, this life, surely over, for, this living out to know about this in our world, this living outside in on for, this living in ours, this living out to know, imagine if a bird, in this beginning of time, was bigger than others, and he knew, he could fly, currents into the

air, and if he moved right, around trees, they'd change over more for, this life, so like, change this river, into this lake, but like, of air, so, these worlds over in for, this bird could just, grow, and keep flying, and all his will ever was, was for this change; these smells, this swirling, this life, because he's building paths, rivers, of air, for his friends, and they know him by it, and smell him by it, and because his will, is always moving across this river, he's there in it, always; it exists, as him, this bird does, this flyer, this surest river dragon, over in, for tu, this surest dinosaur spirit, and a turner of rivers, into lakes...

Chapter 4, Crocodile

This life, over, out, this, world, this, tick,
 tock, for, this, life, they'll, tick, at, you, to,
 fuck, your, pace, right, up, just, let, them,
 know, you, believe, in,
 sec,ond,s,by,now,all,you,need,is,this,pace,but
 ,it,gets,SLOW!!

I hate crocodile. I can't believe you don't
 know what swords, are for. Clocks aren't for
 swords, but swords are for crocodile, and I
 don't know how to tell you, seconds aren't
 real, but this second, this life, here, this,
 short? back? once? over? this? life? here?
 longk? this? back? over? di'rent? sure, this,
 dif'rent, sure, this, back, still, every second,
 ever lived, by any, is different from every
 other, forever, all the time, so actually,
 because they're not the same, they don't,

equal, anything, to one another, and in Time, you were only ever measuring it, because they were all the same, so if you're not, then really, you just got, tricked, by the Sith, usually, or a crocodile, that tortures you, and tricks you, into thinking you can't die of monotone, because it ticks to GIVE you seconds, because you think that it's paced by the clicks? No, they're monotone, and you're waiting for music, so you hold out for the next click, and you'll even turn the tick into a tock, in your mind, but it's the same sound, animals, breathe onomatopoeia, a unomonopea, they breathe it, so it isn't singing, it's ticking, and therefore, tocking, same sound, in real worlds, this real sound, this real life, and here, this surest force, this life against ours, I don't not want to shorten

this chapter, uUp!

But believe it or not, if I don't start some music up, before I go on, I'll get sick, from the tick tock sound I started to think about crocodile, this life over inside on in for this world in God, this pace, in ours, for death, don't, not breathe, these words, just glide over them, and breathe, this surest dragon magic, this dinosaur breathe, this life, surely over inside ours for more, this in our understanding, this in living out, this world, this living out to know about all, in ours, this living out to know about this world, in ours, this little life before these worlds in ours, this living out to know about this world inside ours, this life, surely over more, for, this life, surely over more inside ours, this living on for, this life, surely over inside this

world, this life, surely over, inside, did you know, that I've actually seen crop circles, out where the animals live? I never figured it was anything but an animal drawing the moon, but like, you can't really get the moon shape, without shaping something hard, like, what, else?

Sorry guys, I just wanted you distracted from how ugly crocodiles are, so you can think, now, crocodile, still something you want to always, always, murder in the name of love and friendship, forever, or, sometimes, just escape, and like, I don't know if you know kanji for crocodile, or what we call kanji in different letters; scripture, but it's croc, which is change, odile, besoddomy, this life, over with, croco,dile, croco,dile, croc,o,dile,croco,dile,

this life, defiled, this life, defiled, this heaet,
diled, this back, our'd, this life, dil'ed, this
life, defiled, this world, lived, you need to
start, breathing through sounds, if you're
ever gunna understand animals, what this
word, sounds like, with this other one,
breathed in different ways, this way, over in
again, this life, surely on in for, these worlds,
this life, surely on in against this life, surely
over for, these worlds, this life, surely over,
inside on, backwards over, more for in it for,
this life, this life, this world, these, worlds,
did you know about the alligator lizards?

They like to climb trees, and like, for fun,
it seems like, and they just, live their lives;
it's not really all about food, at all, they're
lizards, they live and live, or whatever, and
like, crocodiles don't seem to do anything for

fun; just carnage. Not for fun, just for carnage, and the curse of the crocodile, is that they are NEVER, Good ENOUGH! NEVER! NEVER GOOD ENOUGH! This carnage! This mayhem in bloodshed! This torture! Never, good,! enough!!

Don't not think that, every day you know about a crocodile, and that there's even one, still alive, in the world, and they're scary, and like, they have stupid bodies, mostly, for lurking and slithering, and it slithers because it lurks, and alligators can swim up and down, because they climb trees, and can hide there, and don't need to flatten out, and slither, and writhe, in agony, as animal after animal slays a crocodile, once or twice, for good measure, knowing the sick will can slither back from the torment below, in the

mud, where it writhed and gathered its, what, sex, about it? No way, this thing is just, torture, and dissatisfied torture, which means an infamous, terrifying, evil that wants to evolve, always, and does, if you believe it, unless you stunt them, and fuck with their breeding, but like, you need to understand the difference, between hatching life, and creating it, or like, summoning monsters, through eggs, like King Piccolo.

Alligators can sew life, but crocodiles just summon monsters that already exist, through eggs, or more like, devil spawn portals, and liken this form over that one, if you're a crocodile who wishes for eternal youth, the mighty Shenlong maybe just, gives you a child that can create, like alligator would do,

a lizard, a great lizard, a dinosaur, instead of a monster you can repossess, like all the creatures a monstrous crocodile monster monster monster like King Piccolo summoned in, through his eggs, before...

The story about Shenlong alligator killing the crocodile King Piccolo is a pretty important dinosaur fable, and I don't know why you think dinosaurs, both evil and good, weren't able to ever change their forms, into creatures like King Piccolo, from a crocodile, which he was, all the way, or for tu in a river dragon like Shenlong, this side, over once, in tu, for the other, that all children borne of love, are immortal? Created, really, that he could promise him an eternal youth, but simply stay his family line of evil, and create of good, like the alligator

baby, Piccolo Jr.

Chapter 5, We Need Dinosaur Power, Now!!

I don't really know what you guys think is goin' on... I'm about to clear the names of the Sabertooth Tiger and the Mastadon, and like, you can suck up later, if they're listening, or something, but you said they wasn't dinosaurs, and I'm like, you clearly don't know any fucking lizards, because one, lizards fuck, two, they don't not, do that, and also, they change form, and find kung fu masters, do to it with, and if you don't know about the massive, massive, insanely varied forms of lizards, someone needs to give you much animal books, because there's millions and millions of insane, trippy looking lizards, so dionsaur changed forms and became, this form, that change about, that aspect, this timing taken, surely over, for in, these

worlds, over more, for in for, that there's such thing as an elephant, and and animal like a pig, could live with an elephant, and grow tusks, because it thought so, and breathed this surest kung fu in harmony with its friend, and this surest form on in for, that pig bodies are especially adept at changing form, and growing huge, in fact, and changes into an elephant body quite readily, in following this surest form for one tu the other mastery of his kung fu, that if an elephant had a baby pig around, the pig wouldn't, not think it could grow to be like the elephant, with its muscled nose, being stretched out, all the time, and he'll try to pick things up with it, and suck up water through it, spray'd out, this surest form, wiggle its ears and ply the muscles, stretch

them out, this side, over one, tu the other, the pig can become the dinosaur, or, just the elephant and the hippopotamus?

They're not dinosaur, but like, the Sabertooth Tiger, was never a tiger, and he is a dinosaur, and you should know about lizards, and what they can learn, from people, and how fast they change form, color, texture, hair is just horns, grown in a certain way, horn is just hair, grown in another way, and horned lizards are everywhere, so hair was easy, for a sabertooth tiger, and this side over in on intu the other one, that they could be alive in any age, and caged not, but understood less for, that this world over for more, if you wanted to believe in a mastadon, you should understand that its head isn't like an

elephant's, or a woolly mammoth's, but like, nobody has heads like those things, but those things,,

I don't not have better proof, that these animals were dinosaur, but are dinosaur, in your life lived without time, and surely on in for these worlds after over more, that the mastadon is a creature of changing not circumstance? This life he could be believing, was lived ever on against one form, tu the other, and on in against this one form, these could be believed, on out, aside, for tu, this world, this, life, that the elephant bones, do not look like the dinosaur bones?

Well no, in this way, that one preserved in this, that one made of this, but like, this elephant used to be a pig, if you didn't know, and this creature, you'd call a cousin to an

elephant, was never anything close to a lizard? It's hard to say, exactly, why you don't think plenty of places, always thought they were dinosaur, because they recognized bodies built with the kung fu of dinosaurs; of lizards, in THAT science of understanding, rather than yours, of this animal modern day functioning similarly? Are we here to say bats aren't something other than birds, altogether?

The sabretooth tiger, this world in large, was never a tiger, and tigers don't not like, the sabertooth, but hell, they could have raised them, and you'd never understand, what lizards did with their horns? Their teeth? This life over, inside on, this life, look at a snake, maybe, if you want, but the Sabertooth Tiger is built like a reptile, and

you got totally, fucked with, on that one, but you know what? You're starting to see kanji in animals, if you've come this far with me, that like, there could be a creature, whose spirit is the kanji for metal, but like, does that make him a robot, just by its nature? Sure like, if you had a cool robot club, and like, this kid was all metal, in his soul, his kanji, you could say, that's pretty robot, but this boy, here, Andru, he's not your friend, he's different, and strange, sure, but this life, he could be an android, except that he's a spider, and lives like you do? I think not, he's a boy, say the homosapien manuals, and this world over, he lies, because he can draw you toward him with webs you cannot see, but his mother does this for him, and she likes it when Andru tortures, and he brings his life

home with him, these children caught up in his mother, Anansi's, lies, this life, surely over inside this one home in these worlds over inside this moment, Andru is the groundspider, and not made of metal? He could be, because, it's the way he tricks and tortures, that makes him the kanji for spider, so what are you, to animals like a spider, exactly?

Prey? What is prey, for? Worship? Are plants the same as drinking blood? Is injecting venom, the same as licking from a puncture wound? Spiders rape, animals they suckont tu, and like, they inject venom, only, and torment, torture, into your wound they're driving into you, and that's what's making a spider, a spider? You should think so, so like, don't doubt the metal boy andru

could be a robot, but not a human, and android in spectral circumstance, or just cuz you saw the metal kanji, in his spirit, but you saw the human skin, so like, what kanji, on the outside?

I wanted to trip you out some, because when you get to monsters, it's like species doesn't matter, and classifications like dinosaur, only apply because of doppelgangers to real lizards; lizards being animals that can lay eggs, create life, sew love, inspire passion, and if they had none, you should belittled be not, this side, maybe in, for these, worlds over, that they are passionate to stay alive for what in these, because it takes the smashed spider hours of writhing to refill his body with blood, and keep his hydraulic form moving? Or because

it wants to keep playing, or singing along, like birds, it wants to have friends, so it has passion, if its a spider, that doesn't happen, but birds kill spiders, bats kill spiders, and dinosaur, don't let spiders exist, mostly, I've never seen lizards not kill spiders, every, every time.

Why? Have you ever seen a dangerous insect body? Arachnid? No, guys, a giant spider, would have to have, reptile kanji, in its spirit, like Andru could be a metal boy, or robot, but nothing like android, which is supposed to be human, but like, don't get distracted, a giant spider, can easily, easily form, from an insane, torturing lizardmonster, and like, do you not see, how fucking fast, reptiles kill spiders? ALL the time?

You've heard stories about dogs caring for children; protecting them, well, believe maybe, that bodies like a snake exist not in small part for these worlds of protective orders; that the snake exists like the spider, and must be tiny, and fast, to try and eek out its evil, sickening survival, out on in this course against, but these worlds over for in more on in for against, that you could believe, just some animals, care for their young like it's real love, and if they do this, love is never passed on? It never spreads? Only some animals, have to start fighting, like they love, and it will never stop, and these guardians will transform, and rise, and change, this lizard, studies that tiger, and a sabertooth could be born? This life, over in, these worlds beside this moment in ours

before it all, this life, in surest form, the tiger changes not what he is, in spirit, when he thrives? He takes not, of himself, to know and change this surest tiger force? This life, in here against? This life, you could see evil wolverines, but evil tigers, hardly enough, for color, in these surest designs, but that the sabertooth wore marks of its own, of its lizard heritage, and you could know it carried these two daggers, fore tu protect in the name of the tiger, guardians, always, and marked like they sew beauty and know its form, this world over in for, this life, against...

Love 6, Love

This life, ever loved, this world, taken over backwards on in it before me, this world in for my own living, this life, surely on in against this one world, this in living out for more to know about this, in ours, for more to know, about, this world, this living on against, this world inside, my life, this world, on in, before, this life, sure so know, this life, in ours, this living on in before these onlyest chapters, this life, surely on in for sewing this creative spiral, this in our inf'ite loup, this life, surely on in for this more, this life, so know, this dog, this course in ours, for more, this world in our, know, for these, golden worlds, this life, surely on, in for, this life, inside, this forest, this living out to know about these worlds, in ours,

before, these spirits of the dog, and take this holy word, and know she is not a wolf, this life, surely over in once, for more, but liken for, this life, in ours, before this side, of life, this world, in ours, to know about this sky, in ours, before my own life, inside this once before my world, in ours, before, this one world, inside mine, that this in ours, before, this one life, this world, in taking over, more for this world, believe in a red dragon, if you like, and you should know, I've fallen in love with one, before,...

This life surely in ours for this sure surrounding, the dinosaur are ancient, but like, so supposed be are the gods, and liken for these worlds over, I've seen *Shinko*, in the forest, and they hail what you could know about her, the real, Princess

Mononoke, and she's a dog, and take this
 form in kanjic spirit, 犬 and understand this
 world, surely forming back on in against this
 life, in ours before this knowing more inside
 our score, this loup, de gras not, this life,
 surely over in ours, back on in it for that this
 was more for in this one score, this music set
 in ours to know in more for hours on in ages
 counted back in nothing here for *shinko*
 calling calling, this world, this in ours for
 more to know about this universe in ours for
 Love is pure in this regarding surely on in for
 this life, that she could want to mate, once,
 with the eternal dragon, Shenlong, and they
 said this was granted, once, in war, and she
 breathed life intu these beast dragons, these
 dog, animals, lizards, all, this life, surest for,
 so take the kanji for dragon, and know about

these dog lizards, this life, surely over this in surest Dinosaur at circumstance, or, fate?

Will?

This one living out to know about this golden course in ours for to know about this living out in ours before, this life, sure sung, this life, these worlds, this life, these worlds, this life, this life, this life, this inside my living on for, this world, this life, surely over in ours, this life, surely on in before this world in mine before these lives in my heart on in for this world, in ours, before, this living on in before this against this in life, and said, like they're lizards, or something, these dragons, these doglizards, were said to be all different colors, insanely bright ones, with different, what, venoms? Spits? Spikes? Wings? Gliders? This life, surely over, this,

lighter body, this forest form, this hollow
bone, this denser alloy not in this marrow,
this living out in all our own forms, this
infinite will with god, this life in ours before
this world, in ours for more, to know in on
for, this living in for, this world, this with
God, this living for God, this life, surely over
more in these forever on in for this in sex for
this knowing of god in this life, this cause we
could lay in our poul, this living out in this
life forever in god this above, this on in
before, this living out in before these worlds
on in before, this world, this life, sure so
know about this living out to know about
this living out to know about this world
inside ours before me in this living out to
know about this world inside my living out
in ours before me, this living outwards, this

inside my living on in for this world, this life, surely so know about this only course in for ours, this love, for these worlds in ours, this was Gaud, this life, sure, so know in about these golden courses, what did God have to do, with lizards, before, to convince you, these purple not, violet, yellow, green, surest red, dinosaur, these dragon, couldn't be real? Couldn't be flying, this surest form, this dog in lizard, this surest kanji taken for spirits, soul, in all, for, on, at, against?

But this girl I fell in love with, this red dragon, this dinosaur, I could know that, she was living maybe, a different part of life, in ours, and knowing more in this before my own life before this circumstance in God before this life in ours before to know about this hope in ours before this standing on in

before this life, these worlds, this living out
to know about this world, this living on in
before this world, this life, these worlds, this
taken course, this granted course, for ours,
so, sung in and on, for, this life in ours, for
granting more for God, this in my, life,
scored and taken back in love, again, this in
music scores we know, there for in hope
we'd go, this deepest depths in oceans blue,
this world, this life, surely over on, that
could you believe, that we breathe air and
water, in the air, and I'd breathe water and
air, in the water, and I'm not sure, why you
think you have to be taught to drown, but
you do, and this world, over in this sight,
this world, over more in ours, that this was
gone before, this world, in ours, that at the
very least, dragons, these lizarddogs, could

just breathe, whatever was around them, and no one told them to stop moving, underwater, so they moved like they knew how, and did, and breathe, this way, over in, and size, in the sea, is so fucking scary, I can't tell you, how much fear, I have of the ocean leviathans not, but the sickos, but sure, let's call for Leviathan, because I heard she was a lizarddog, a real beast dragon, and a slayer of evil, sure enough; and a dinosaur.

This one world, this life, in ours for this ocean on in against this world, that really, Leviathan was supposed to be a dragon of the sea, but I also heard, she tore Viserion apart, when Freiza brought it over to her home in the seas? Yeah, they just keep going, but like, that's why I wanted to tell you, about the

seas beyond, and what they say, about round worlds, okay, but, whatever, if you kept going, then maybe, if someone said, there were dragons at the world's end, and you saw a dinosaur island, then, like, you'd either have a lot of fun, or your crew would mutinee, and like, that was a guarantee for thousands of sailors, all over the, what, worlds? The seven seas? Who said seven? Who said India? Who said it? I live in a world of changing spirit, this life, surely over inside ours before against this world, in my living out to know about this world, in my lifetime taken over inside on in against before this world, this life, surely over inside on in against this living out to know about this one world, this living out to know about this life, this colony, here, sell, this, spice,

take this name, know this, course, this in life, these round worlds, follow, this north, sure, four worlds, this life, surely over inside ours this life, you should know, that like, with people who tell stories about dragons, you should ask, what North, South, East and West meant, to a Kai, instead of to, a giant mountain.
