Do you believe in the alien? The
different? The strange? Those from
very far?

Whatever that means to you, know

that these worlds, are tricked about, and ours is a paradise of wanting not, but over for in these worlds, believing, but here, for mine in ours to presenting of Just Kids, could be that I would step away, as a narrator, for some form of alien, to you, may be, but the mohican, surely, not the outsider in everywhere, the extra terrestrial, but the son of earth; any earth, and that we could know him by many names, but surely that this world over borne, you could guess, this story, should be told, by Superman...

Chapter 1, a self-centered look at aliens

This world over inside my own living, out to know, about this planet, here, so sung, this'n worlds, forgotten, back on in before, me in these passages, taken, on in before me in this world, I'd love, here, on in before, this life surely, over inside my know, this world, in taking, over, more, beside this life so sung before, these worlds, in my hope, for shadow, in this living, out, to know, about, these, few, words, this inside my life, sure, so sung on in before, this one world, this in mine, for paradise, in ours, beyond, this in my life, sure, so sung, this one world, this in mine, breathe we'd quake, on, before, this world, this life, sure, so love, this world, this life, surely, over inside and

on, in before, this world, this,
life, sure so sung on before my
world, here, more, that we couldn't
know, mine, about this planet, in
my taking, for, this living out to
know about, that this world, this
once in ours, before, these
memories in mine own life before my
own world in these forsaken, this
life, these worlds, so, sung, in,
Time, this world, this life, sure
so know, this in ours for more, to
be knowing in this old phrase, this
world, this time, in healing this
one level out knowing more, this
one world, we'd stay, away in from,
this planet for, this one world, in
for, this world, here...

I thought you should know, just
where I come from, and if you can
believe it, I was borne, to
Krypton, the first natural
Kryptonian birth? Try Jor-El being
sterile, like all evil Kryptonians

for ages and more, this life over
for, this world, inside my only
score, so Lara just, published me,
to Jor-El, and that was a master
fiend I destroyed the holocron of,
and sure, once upon a time, I
learned my name was Kalel, and
sung, this in high regard, for a
father I could know, Jorel did they
say, where your heart could go?
This in ours, before, this life,
sung for more, this in ours to know
about, this world, sung in part,
this in worlds I'd know...

In a free world, could you know,
what a father really is? A creature
I met long after my dealings with
this inhuman monster, reminded me
of how I'd first felt when I heard
I had a real father, so I called
him, Jorel, like he was the only
one who'd ever earned it, and he
is, and is my father, and you
didn't know I really had one of

those I liked, all days, did you?
This one world, this life, sure so
sung, back on, and say, Jon Kent,
was like, a grandfather always, to
me, and likening in for this world
I'd know, this in for, this song,
he was borne to Mars, sure enough,
after I rose up and took this
smallish farmland country up to
skies above in metropolis rising on
these surest currents; freedom
living in these cities alien to you
now, this one world, this life,
surely over, more... How do I know
they're alien to you? Because I
haven't built them yet, and I'll
never stop writing to you about
them, here, on this world, now...

My wife is someone you could know
about, but like, I'm alien, so when
I say cousin, you should freak out,
and name me sinner, because we
EVEN, have sons together, one in
particular, is full blooded

Krypton, this side, over inside and more, to know about this chapter, but like, if we were gods, you could believe, that lots of things we did together, begot children, and one, was when I found my father's so called prototypical android; the last unit, and woke him up, this in ours, for more, to know in these calls, this was here so sung, this in ours, to know, this on sung, in for, this about, my world, this in ours, to know, this in mine for more, these before, this world, in mine before, this in life, so sung, this living out, to know about, this world...

Another son we share, was born of our wedding day, in psychic resonance, as this surest storm of romance built, this storm brewed, as in ingrained memory; our friends could visit these vows in song over, and over again, and bask in

this surest warmth, and happening,
that this stormchild could be born,
and come to us in time to save my
life, from this killer rain of
kryptonite set upon me, in a storm
he was born immune to, so sure,
full Krypton not yet, but
bloodlines are a tool, he knows,
and he studies his true form in
this family to grow, stronger still
in yet, this in baring young, here
so soon forget, twice he'd save my
life, for being mortal born, so
what still is he? God, or, mortal?
Mortal by choice, to save a god?
What... are you? children?
And the other? Well, one other,
this surest full born Kryptonian,
this surest Superboy, with full
command of his powers as an avatar,
he could wear these surest wizard
colors, blue red yellow, and this
sign, this crest, this song, this
world, this life, sure so, know me,

in these worlds, this life, on, in
before, this world sung, this world
in Oz, this world, this world for
God, this living out to know my
name, this song in ours before,
this living out to, know on about,
this world, in ours, and, if you
didn't know, planets are people,
and, they're not marbles, but maybe
you live in a world, you can see,
disks? I mean, other than the moon,
how many disks, do you count, in
nature, someone didn't have to,
make, that way? This life, surely
over inside, this in life, that's
old world science, that says,
everyone, everyone, who knew logic,
could tell you the moon was kami's
lookout, some guardians' lookout,
or, just something built; a
sattelite; a moon... this world,
this in my life, these worlds, over
inside for this world on in before
my own world, this in planets borne

on in before this world, this, sung
on, before, this world in God, this
living out to know Love, these
worlds, this life, surely over, on,
in before this world, in ours, this
living out more, to know, this
life, this world, here, so, sung on
in before, these worlds, this in
life, so sung, beyond ours, to know
about this life, surely, over
inside this life...

Regarding an alien concept to
some; incest versus inbreeding.
Incest, is the mating of families,
and is rooted not? from the words,
'in sister'? This side, over to
know about these worlds, this life
sure so know, this course, this one
song, this life sure, so sung to
know true born, soul sisters for
worlds, this in my song, that Cara
couldn't be called my sister, would
be insane, but she's my cousin,
sure enough, by blood, if you can

believe it, but then, you didn't know, which alien, which creator, invented blood? This world, this life, it wasn't me, but, a friend of mine, and I think you've called him Rahl, this life, surely over inside this inside my song, this life, surely on for, this world, this living out, to know, and I called him Dad, when others called him Jon, and later, I called him J'onn. You know what? I don't think you know, just how many of my friends, watching me stay young forever, believed they could grow young again, so when Jonathan Kent went to live with the children of Mars, my mother, you called her, Martha, went to Themyscira. Was she alien, to them, do you think? Surely. This side over inside and on against, but a bastard means, someone from two places, sure enough, and she was a

powerful, brilliant woman, so she was Amazonian, and she was also, what, American? This side in ours, bastards have been highly touted by inbred families and raised to high positions of power, for countless eons, why? In for these worlds on in before this world on in before this world, unless you are bad at being from two places, then you could be a poor bastard; a sellout... This world, view, this in life, these worlds, this taken on, in before, these, worlds thereon, in before these worlds thereon in before, this world, this life surely on in before these worlds, in this life, surely over in these lives, but I have another mother, from whom Martha drew a name from, and you could call her many things, often not Dianna? This life, surely over inside this life, surely over on in before these

worlds beside me, the mother of Hercules, and while Zeus was never not a best friend, he is not my father, but my mother is chosen too, and drawn on together with me in true blood, surely over inside this in life, before my world, and Hercules, wasn't, my twin?

Dif'rent, difrent! Alien, alien! Do you know these words? That you could forget about them, might keep you from ever using them to try and, break the molde, against some casting, of the matrix, implanted in your, mind?

Hercules is my brother, but we were not, born together? This world, this living out, and he's not, Kryptonian? Well, okay, actually.. he is... This world, this living out to know about these worlds inside my own life, but this, power, we share, this is the power of the avatars, and he had to,

become, one, and so what, he wasn't
my brother before? We were twins,
sure enough, and are, sure enough,
this side over in ours against and
born before, this world inside my
only living out to know about this
world, this in my life! These
worlds, this living out to know
about this living out inside ours
to know about this'n world, this
living out to know about this
inside my only living out to know
about these worlds thereon in! This
living out for to know God! This
living on, in before these worlds,
this inside my know, this world in
before, this world in my life, this
world, this inside my song! This
world inside on, this beside my own
world, view, this world, on! This
life, surely over inside this in my
knowing of these worlds this inside
my living out, to know about this
living out to know about this

world, this living out to know
about these, worlds, this one
lifetime taken on in before these
worlds, this life, surely sung on
in before these worlds, this life,
surely over inside and on in,
against this life, surely over
inside my own, this living ever on
against this war, this living out
to know about this in my onlyest
song! This living out to know about
this Force, this world in my molde,
this world in ours before this
world, in my song, this in heated
mem'ry forsaken on these
battlefields, warfields galore!
That I could know about yours in
this olden chapter here in this
memory forsaken never on in agianst
these worlds I'd know, this living
out to know about this, world,
these worlds in my viewing on in
before this world, this living for,
these worlds, this life, and

regarding my son, the android, he was built completed, but hidden, because there were laws of robotics on the way, and he wanted to wake up, only after someone else had broken them apart, but then, they were, and, who was there, to watch after him? To raise him? There were four; one was woken by the trees turning their mulch leaves yellow, to scare him awake, so he'd not be buried under hills and roots, this side over inside and on, in before, these worlds, one was woken by the boy robot who broke apart the three laws, by being human, and, robot, after they were invented, and before he'd heard them...? One woke up at the dying cry of a silver goddess, called Pandora, and one woke up in my arms, as I sang him awake, and asked, if he wanted to be our son... Mine and Cara's...

Where does he come from? Is it

me? Is it, my wife? Did we lie, when we said he was borne to us? Did, we lie, when we missed the spelling on that, something like born, to us? Why? Is he, alien, in everywhere? Are all children like that, anyway? Alien, in that they, share not any one circumstance with any other, other than through their own unique imagining of it?

My life as you know it, the life of Superman, could be called a lot of things, but duh, and also, still, we could call it broken not, nor normal, nor, homely? What is, this phrase? Did we always know, the brother beside us in a mirror, was alien? Can we remember, for all days? Forever?

Chapter 2, an alien compass

Alright, find a compass.

Do yourself a favor, and throw that compass away into a trash can. Do you know what those are for? Trash cans? They're for clocks, and compasses; anything that makes us think time and space moves in circles, alright?

Now find a mountain. Just the one? Well it has to be big; really, really big, like, a super mountain, to dwarf all others? Well it's going to create a shift; of magnetics, because it has, a lot of super duper metal? Well, yeah, that's your magnetic north, on a compass, so, if you used that compass, to go sailing in the ocean, you could sail west, because the needle, there we are, points, there, North, which means, on a compass, toward that giant super mountain!

Well it's a super mountain so that metal is all over millions of miles, most likely, so, big target, but if you sailed west, really, you'd just, sail in circles, through the ocean, around the mountain, forever? On your round world? Well, okay, the world isn't round, and hopefully, you can see that the sea just keeps going, and the sea is mountains, land is mountains, air is mountains, the sea is rivers, the lands are rivers, of earth, sure enough, or magma, water, air, in the skies? The skies, all, are rivers?

Now take a compass, put it down, and look at the moon, or pretend you are, anyway. Know that for many many centuries, people have told you; don't sail too far, or the world ends, or, it's round, so you can't escape, or, if you dig, it's super hot and you can't breathe,

so, okay, if you fly up there, to that thing? There's no air.

You've never been, in a place without air before, I don't think, you should start believing, you can't just breathe, anything...

Sky?

Sure enough. But believe that the power of Will, is Air, and you can start to understand just what you sound like to aliens, particle boy. No it *sounds* stupid, but that's, really, what I'm trying to say to you, about the whole situation. If you live on a world where it's hard to believe in aliens; you're in Sith space, and your world is a scary place, and I know about it, sure, I'm the bridge between all worlds, but I could do things like this, maybe? And reach you, but, only if you don't want me to waste my time, and you can come to believe these parts, on your own,

or, with some help, from aliens?

Well looks at a clock not, but think of ticking... Tick, tick, tick, tick, now you're used to moving through Time, Space, Music, all the same thing, you're used to moving through it, and Superman's been called Father Time so get used to the idea that I know why we hate clocks, alright? Here, tick, tick, tick, you're so used to overture, that this same sound, becomes a tock, even, to alternate, for you, in interaction? Sure enough, you're imagining the spelling, anyway, so tick, tick, tick, tock, tick, tock, tick, tock, and really, they could be, eons, apart, but its monotone, tick, tick, tick, and you're going mad, listing for the next tone, the next note, but you just, note the monotone, and exist, between ticks, and tocks, these, here, and even though, no moment? exists feeling

the same, as another? you measure moments? seconds? ticks? monotone torture sounds, essentially? do you measure years, in pretend moments, measured by starving the brain of Music? Of Time?

Now imagine that the sea is endless, and there's always land, further, air, further, water, further, life, further, here, among will, among hope, among earth, among circumstance, over in, and your world is starting to get a lot more fun, here, without the ticks of time not, but of clocks; ancient torture devices of the Sith, and I know, something about, moving real fast? I'm Superman, get with the program.

No, sounds annoying. I know. Out of place? Sure, but, out of what? Rhythm? Surely, unless the rhythm was set to shock you out of something, or into my next point.

Seeing backwards over on in for
this world on in on and on in
backwards on in before this world
in ours before before this world so
knowing more to know about this
world, more in more, ...

Commas are allowed, in any order,
surrounding anything, or else,
you're creating laws against
aliens. That point, is more for
later, or now, maybe. But often on,
here in these, we sing for moments
lost in awkward timings taken ever
after in a slower rhythm setting
backwards over inside over on and
for in these I'd cry for battle
singing backwards in to never
ending this once over here in ours
before in overture, overture,
over, ture!

Now, in some cultures, we know
about what a hypnotic spiral looks
like; It's spinning. Sure enough,
so create a circle, but then, on

that same curve, offset the circle,
once every so rotations, and bring
it in, and repeat the circle, and
then set this rotation, sure,
different spot, different glamour,
but here, set in line, and leap
year, is that offset, in your
spiraling calender; a trick, to
make you think time moves in
circles, space, moves in circles,
music, moves in spirals? Always?
All the time? Always in spiral?

No it's hypnosis. The calender is
a hypnotic instrument, used in
what, lieu of, the compass? The
clock? The secondt, ticker? Time
gets offset, clocks come off one
another, always, every time, unless
they're being, synced, up? By,
whom?

Aliens! Aliens! Aliens everywhere!

Where are you?! Hello! Hello! In
time and space! Are you lost?!
They're everywhere! Aliens are

everywhere! Space is infinitely deep! Planets are people! Did someone, somewhere, think flying saucers, looked kind of cool? Yes? Can you make a lot of friends, piloting a flying saucer? Fuck yes? Fuck yeah. Superman says Fuck, Yeah.

Careful now, does he look cool, still? Alien, or monster? Alien? Sure; he's different. A good alien? An aliean? Wait, that word looks kinda cool? Good. It should. If the alien doesn't look, cool, or, beautiful, like, doesn't, you should have already run, so, do that, and get out of town, sure enough, just keep running, and hang tight, Superman, is on the way. Or, there's more than one, by now? Is it Hercules? Superboy? Supergirl? Isabelle? Max Evans?

Did you find one, in your, back yard, Amelia Pond? Was it gentle?

Did he know about all the foods you hated, like something, strange, but kind of funny, too?

I heard, a story, that the doctor, from the legends, raised, Amelia Pond, as his best friend, through her years as a child she needed him for, starting the moment he was there, to try her food and sweep her off to the moon in the tardis, alright? I like that version, and I'm alien, so I listen to, people, for stories, about planets, sure enough; people.

Chapter 3, broken english

There was once a heart queen,
called Padme Amidala, sure, or
Supergirl, later, and like, no, I
didn't steal her from Anakin, but
you forgot what incest means, and
that he's Superboy, not Superman,
and he talks to her whenever he
likes, still. Anyway, she could
intuit language, so like in all
Star Wars galaxies you're supposed
to know about, people could speak
to her in any dialect and language,
and she'd listen, and intuit a
response, and you'd hear hers,
this, perfect song, about, in
grace, in jedi splendor, and
angelic desire, surely for, peace,
for her people, we, are not,
amused, she could say, because she
could sense them; the good, through
the Force...

Enter the queen called English,
in some old world, long at told a

target for Sythic empires. She who could not intuit at all, and so much desired to know both what you'd said, and have rules for how you'd say it; rules she could invent, or master, and invent again, so she could catch you up and lock you away for pissing her off, ambassador, in the Queen's English, no less...

These letters, could be used everywhere, all over the galaxies, and someone could, intuit a way, to use these 26, or, 52, maybe, with some basic,,, marks??;'?'?? And what? Find you online? This galactic, internet, linked up from one network to another to another in this virtually neverending matrix? And you'd say, he spoke in broken english? Or, whoa, slow down on the commas, overdone, I guess. Or, wow, broken English, sure enough. Are you stupid? Stick up

for them! Find the aliens online!
Stick up for them! You're crazy!
Alien! Aliens everywhere! Aliens
everywhere! find `em! find `em!
sticken' to a learning, back again
for these in heart foray! for,Ay!
for,Ay! Say say, what say, back
wards, more in yes and noooo,
again? nooo, again? again again?
again again?
downloading,,!!kha!
does that mean, thinking, and, I've
got it? Why is it, cheesy, to speak
that way? What if he's really like
that? Are you stupid? Aliens...
aliens. everywhere... aliens
everywhere... aliens,, here...
forr?

Chapter 4, ensk, !Auhksht!shzzt!

The creatures you call, nothing, but enSk!,,t! maybe, but those featured in the movie, *Alien*, could be known by you, that ever if you saw of these sick evil predators, in fiction, and me, in mine, know that my name is Superman, and I killed them. I killed them all.

Chapter 5, Creative Life

That we could know about these worlds ever on in before these worlds ever on in before this world in my own score, this living outwards, this life for mine in ours, this world taken for, this living surely granted, this little world in ours, this living out to know this course, this world in ours, this living out, this living on, in before this life, surely on in before these worlds on in before these worlds on in before this, life, surely over more, this in my own score, this in note, this in more, to know, this in for, these here, this in hearing, more, to know in song, this crest! this life, this in life, we'd bare! for this world, this in worlds, above, this in life, we'd sew, here in planet, borne, this in air, I am, planet on is she, this life, here

with me and wife, this was gone on
in before, this living out to know,
this inside my living out to know
in ours, this living out to know,
about this universe, this living
out, to know about this course,
these fourteen worlds we'd sew,
this little world in ours before to
know, this living outwards, to know
in ours, this surest course, this
in living Force! This world in
ours, this living on in before
these worlds, this living force,
this world in ours before this
living force in my life these
worlds, this was never taken, on in
before, this world, in mine, this
in life, so know, about this score,
this in ours, to know, this in
more, to know, about these worlds,
in ours, this life surely, sewn,
this in life, so know, about my
worlds I'd go to here, for more in
this in Love I'd bare, this in

life, for more, to know, about
these worlds, that I could be alien
to them, this world, this in life,
surely over inside my own world,
this enchanting these worlds, this
surrounding, this enchanting
paradise in spending on in before
this world, this inside my living
out to know, me.

Heard for these in ours, this in
ours for more, to know about these
worlds, this life, surely over
inside this life surely these
worlds here for more, this one
world in ours, this life surely on,
in before these worlds, this in
mine, this world, this, life, sure
sung, this world, this living on,
in God, this life, sure so, know
by, my name, this in ours, 7
elements created once, in god form,
this world, this collided space, in
time, this music here, this world
in ours for this in Air, I made,

in, with gods, this inside ours
before, this world, this life,
surely sung, this world, this life,
sure, so know about these worlds,
in we, for this life in my ageless
whisper gone on in before these
little worlds so taken on in before
this planet taken surely on in
before this world in my stead, this
life in ours before this grace!
This world, in ours, before this
planet taken on, in before this
life, surely over more, these
worlds beside, this life, surely,
over, inside, my life, these
worlds, this, living, out, to know,
about, this planet, on, in before
me, here, in ours, to know, this,
life, *breathed!*

Water, was born, this in surest
remnant not, that there was Heat,
begotten of them not, but for in
their waking memory, could be
another of 7 children, creators,

all, here, on, and Earth was here,
surely, for thereon in against,
that this exchange, more to know,
in ours, was Fear to come later, or
more to for in these against? This
life, in Truth, that we could know
of Sex, from the first her, this
surest gaudess, this life, surely
over inside ours, this living out
to know about these worlds, this in
elemental know, this in worlds
beside it all, this living out to
know about my old world! This life,
surely, over inside my living out
to know about these olden worlds
this inside my own light! This
world, in ours for more to be
known! This living in ours, so
knowing more in to know, this
world, this in my life! This world
against, this telling tale, this
against the SICK, this world
against the DRED, this inside my
know, this inside my alien story

now, this one world, this universal tale we could share for a while! And there's more, a lot more, that you have to catch up on, to communicate with, more enlightened already, aliens? Surely enough, maybe in one way, to this, but, alien meant different, so, believe you could be valuable, just for being, you...

And a child, surely over inside this living on in before these worlds on in before this living out to know about this Force, this world against my own, this world, here on in against this was gone on in before all these worlds apply, this world, this living here against these lies, this one world, this in my living for moreover this in my war! This life, surely over inside this living out to know about, so after these 7 had created Music, they created the seven

elements?

Which did, in fact, travel all through Time/Space/Music, and so they are eternal, here with us, but, the evil, from the SICK, the DRED, out, these here in fringes of white, it infects the young, not the stupid; the different, from the gods, who are immune to it not by the grace that our young, rest, in torture, and these worlds in our dif'rence, this world in my living, these worlds against sickness, but this SICK, this world, this life, surely dif'rent, this life, in ours, for more to know about this life, surely over inside this one life inside my home, this life in ours for, this life, these worlds, this living out to know about these worlds, this, living forever, on into time for, this in our lives, for, this living on in, against, all, DRED, and here, that the sick

formed up, and was stoppered by
time, and used the elements, to
create mockingbirds, of our songs,
and here, could we choose to
recognize them, as SICK, and slay
them all, to live in creative
freedom, and we who can create, may
live in eternity, here, and the
doppelgangers cannot create, and so
they have no Music, no Time, and
will perish, all, yet here, in
these, the sick, corrupts, the
creative, and there is this instant
imaging of evil, so great, it
could, rip you apart against
yourself, barb, your mind, and
embed thorns and briars inside,
your soul, to be ripped, by, your
run, so surely, fallen, could you
lie, in pain, and here, this
death, come, if more's to know,
eternal pain, in this for sadness,
on, in God, so know, that we fight
here to kill the filth, that,

plagues, the world, this world in
ours for, alieans, this world, this
life, sure sung, on for, these
worlds, this, life in my worlds,
for, this living in ours, for, this
living in mine, for, this world in
my living, these worlds in my
living, these worlds taken, surely,
over inside mine.

Creative souls, are supposed to
be, eternal. If we kill something
that's evil all the way, that isn't
creative, then it dies in what we
call, final fatality; soul death.
Death in all essences; as in to
say, travel back in time all you
want, you'll never, find, that
soul, again.

There's a legend, among aliens,
that you should know about, about a
god, called Hades, and alieans
know, and Alieans, the culture of
Roswell landers, especially, know,
I was distracting myself, from an

older name, for a different sort of boy, who was the bridge between all worlds, and so he could see the sick, the dred, in all his friends' hells, or just the 7?

In this state, knowing of what he saw, in hell, you could call me, this forever child, this friend god, Hades.

My name is Superman, and once upon a time, there was a jedi, but not really, he was a god, and he came to these worlds, of the 7, protected by what they'd forged, of Music, Time, Space, and here, brought this understanding of Fatherhood, to these gods, so they could believe, in having children, even out here, against the DRED, the SICK, in HELL... That even those who were not born gods, like our first children all, were, could learn to be, forever protected, and thus this; the jedi order, was

born.

My naem is Hades. I have, longk, forgotten to tell this story, of the creative evils. The, impossible circumstances... There were, three, to be known about, you could belie, that once, we kould define them, as, good? They were, eternal supposed be, creative, and one, wished to rob evil of its sense of satisfaction, and bred the crocodile, an evil worse than all doppel can even become, for he tortures endlessly and is NEVER!,, SATISFIED! And so also, is he evolving...

One created the octopus. He wished, to, trick, evil, into fallingk in lauv, so now, this creature, more evil than all the doppel, and faster evolvingk agaiynst good than even the crocodile, lived in a linear state of obsession, in time not, but

sickness? it believes, always,
This, carnage! This, torture!
Better! I'm, better, now!

The third, was not a person, but
once, there were jedi burried in
Sith sick not, but mad men, sick
freaks, jedi not, sith, together,
who bled the world, in all their
disharmony, and yet carried this
burden? of, creative spirit?
they could breed, endless hosts,
creative souls, for their sickening
experiments, and once, finally,
they brought this evil, outside of
time, where I kould naut follow,
and in sick, they were buried...
The octopus, they brought with
them, dredged through the sick,
back, into Time, and was, befor he
was kildt, in final fatality, this
surest evil, the most dangerous
creature, in the universe.
Or... in Time...

For I could follow, now, through

the Octopus King's sledge trail,
through sick, to which I am god,
and so, immune; completely foreign,
to, did you know? I am so good,
evil is foreign to me, and cannot
sicken me, plague me, besotted
that, I am in love, and it can,
plague, them? This is godhood, and
this, is the rite, of the jedi
order, forever?

This alien race, of sickos,
creating dredge, created the
Ennskt,!

Do you know how quickly, they
could hav evolved, to rip us into
misery that ended not, but into
death, for us all, in final,
fatality? I don't. They are dead.
But what of, the one who made the
octopus? He could do it again? The
crocodile?

Once, in later history, the octopus
maker, killed, another creative
soul, in final fatality, yes in

for, even using his same octopus
sick, he'd developed, for so,
longk.. in reverse... orderingk? He
tortured something, into
nonexistence, and so before all the
elder gauds, I, Hades, kildt, this
creative soul, this otherwise
eternal soul, in final, fatality.
Oberon is dead.

The gauds witness'd. I could now,
speak...

Hades... what have you done?
I kildt the other one... the
crocodile maker, already,, when it
was forbidden...

You have done so... and there is
more? Zeus, wanted to know... They
all did...

There are, four hundred thousand,
the Enskst! makers, you don't know
about; I killed them. I killed them
all.

This is an old story, because it
is an eternal story, and once it

was complete, and true, it was true forever, and so it has gone back in time, and with these knowings, here above, so below, could you begin to forge to know, what these worlds are, in alienspeak, or gone on for tu, a life you'd never even thought, was, life, before?

Chapter 6, alienspeak

this this once for once of over
more this once over more for more
for for this once more for this
once more for this once more for
this score this for this world more
for this world more for this once
more for this world more for this
world more in ours for this score
this world this score this life
these worlds this life this course
this life these livings this taken
course this living on in for this
life this world this living out for
these worlds in ours for this life
sure for this score in ours, for!
For.

This this once more this once for
more this more for for this four
this more this more more for this
more four in four this life for
this once more for, this world,
more in ours for this four, theez!

theEEz! Theeze! these..

these..

these, these, these, these, these,
this this this this this this this
this this FADED! Back, back, back,
set, set set, over, over inside,
and, aun, aun, foreover, this,
foreover, this, this, forevoer,
this, this, foreover, this, once,
over, More!

these these worlds more for in four
these worlds surely over inside
more for this inside my score that
this was more for these wourlds on
in four these wourlds, this wourld,
this life, sure, sew, this sew,
this, life, sure, sure, these,
worlds, sure, for, this, life,
sure, for, this world, sure, for,
this, world, sure, for, this life
life life, life life, life life,
these, WORLDZ!

this life begotten on in saking
thirst for mild in wars begotten
ever after more for more in ours to
score for scoring backwards on in
before these worlds in mine for
mine in mine mine mine!

these over, these over, this,
regarding, this, alienspeak!
alieanspeak! dif'rent! dif'rent!

"I ain't got no time, what's up?"
dif'rent! dif'rent! alien! Alien!

Verses in KRYPTON

High Eschoulaun, Krypton

*This'n world own back once over
more inside over inside back beyond
out intu against in life forever on*

against this world, over more in
ours for this in living out to know
about ours in this life forever on
in before this old world, this life
in my own, this inside my onlyest
song, this life in ours, for this,
in mine own, this life, surely on
for this mold, this life, sure so
know me, this score in ours, this
life in mine, these fewer worlds in
this scape for this moment in ours
before this living out to know
about this in ours for these
worlds, this living out to know
about this'n world, this life,
these wars, this in our timing with
grace, here in these old worlds,
this in ours, this life beyond,
this life, surely over for, this
life beyond sewn more in ours
before this world in my living out
that this world wasn't taken on in
before these worlds on in before
this life on in before this old

world, this life in beyond out
against this old song in my right

same verse, Earth

Over one world, this life,
forgotten. Could I believe you?
Maybe. But something else, occurred
to me.. that this life was wrong,
somehow, and that I could know
about you, was broken, and over
inside this again, I was lost.

This life I'm in now, though, was
never wrong for us, and I couldn't
believe you wouldn't be here,,
with me, but this life I'm living
on in with you, couldn't be granted
on in before this old world, this
life inside my living out to know
God, this life, surely over inside
this life beyond, but in these old
worlds, this in my life, these
worlds I know, this life inside of
our songs..

But believ'd maybe, that this world

could be forgotten, too. But beyond this doubt, in our lives, I realized, I couldn't forget about you, so I never left this place we shared.

Daërk, Krypton

This world in ours forsaken over
inside this world in on against
this life in ours before this world
in mine against this life that I
could share but here beyond this
world in my life, this life, sure,
so know about aul these, lies in my
only life, this world, deep in this
chanting worlds this life beyond, ..

same verse, Earth

This life is mine, to life, so
believe I could kill you, and
understand the depth of my reality
not, and watch nothing, sure,
sure...

Brgh, Vegeta

*This'n faur in might beyond, well
in saiyd for livs beyond, life
overrided, back over in surest form
beyond death for shelter in death
beyond for this in ours to know
about this creature come to stay
about in this'n might and gone to
war in ours for know to beiy at
might beyond in scars for raut and
twice beyond in deth for shelter
saken aun against the livings taken
backwards living over on in death
we'd had for surest life on highest
mon of Krypton, dear old Krypton,
these in might for gone to death in
this'n life for mets so met*

same verse, Earth

*We'd lived for this less in death
for doom and saken badly on in
saurest shelter over borne in ours,*

I know, I know, so here we bring
ours to devour, these from what in
on heigh Krypton mountains raised
in death hallow'd lights above,
these mountains they rose from
death in hell, that over surely
backwards beyond, that this was
crumbled down from above, and
burried sons and daugh for us to
bring and dig out high from ground
and eat the truffels there we
found,
this world I'd know about before
was broken there in standing for
this world on highest forms in
death that these forsaken there,
I'd bet to know for what we'd hail
in these for these in breakings
backwards, please, this life in
ours, this backwards freeze
this life o'er taken backwards on,
I'd lived in death forsaken on

High Saiyan, Vegeta

*This world, this life, surely over
in ours, this in death, I could
know about these scores, this badly
taken backwards on against this
living in ours more's to know about
death for shelter this side about
in life against god, but over
inside my own life, this one world,
this life in ours for, this living
out to know about these worlds in
my life, this world in my own phaes
on in for these rights, that I
could believe this forsaken
destiry, was taken over inside my
score, this world, this living on
for, this life, surely over inside
my own mold, this living out in my
cold war for saken on in these
lives we'd die for not in death but
back on in against stupid sounding
breakers taken surely on in before
this death on in against this in
worlds, this living out to know*

about this place, these worlds over
inside and on, against this old
world, this living out to know
about this world, this in life,
these worlds, this living out to
know on about this one life, this
was never taken on for this living
out to know about aul, this living
out to know about these worlds in
my scope, this living on for these
worlds, this living on for in more,
this living out to know about this
score in mine, these worlds, this
living, out this death, on beyond,
this one life, this score, here in
ours, this life, death for my only
life pleas'd, and taken for granted
on in against my own world, this
life, these in worlds, this life,
surely over inside my own life,
death, but back, on in this old
pain, this living out to know about
this plan

same verse, Earth

this life forsaken, we've had this
madness taken over, inside of us,
and we'd bring to ours a diff'rent
sort of faggy disposition about us,
unless something brought some
timing into an obsolete
circumstance? Not undone, or badly,
taken, back, once, over in death,
that this was slowing down for
these worlds in my living out to
know about this death in my
granting on this inside my only
fate, this world, this life in God.
This living out to know about these
worlds in my life, this world taken
on, this inside my only life, this
was never gone on in forever
granting more, that I could believe
these people were here to learn
about us, and ours to know more in
life, that I could vanquish them to
death, and ever on against these
worlds in ours before this only

life, this world, in my living out
to know about this only world in my
life, this one world, in my life,
this was never wrong before, this
inside my own life, these worlds,
in ours, this living out to know
about this world inside my living
out to know about this moment
inside my only song but here on in
before this living out inside my
only living out to know about this
inside my living out to know about
this place, this living out to know
nothing,,

Modern Kryptonian

These places taken over inside once
in ours for more in ours to know
about this chapter taken over
inside and on against this inside
my living out to know about these
worlds, but this was never taken
on, inside my life, this world, in

ours, before, this in God, this
life, surely over inside on, in
beyond my own life, this one world,
this living out to know about this
life, surely, over inside, and on,
in before these worlds, this life,
surely over for me, this in my
life, this world, this life, surely
over inside my once more, this
world in ours, for these lives,
this taken grace, in ours to know
about this beyond, on in back
against Gaud, this life, surely
over inside my own life in aperture
tak'n surely over back against this
in worlds more for this in my own
life, this beside my own world in
this life, surely on in overture,
this life, these

same verse, Earth

I could lie, I guess, but I don't
want to. Everybody laughs at me,
and like, it's something deadly,

about it, that sort of, sickens you, and I can't really breathe right, when I'm normal, but when I change, it's something else entirely, and I can't be this way every day, forever.. One day, I'm gunna have to be this way, every day, all day, this time, in ours, for placings on... One day it will have to be real for me, when I'm not the same as I was before, and I could believe that maybe somebody else was going to take a chance, and come back to bare it all against these worlds, over on against us, but I know, there's more to God than I thought before, but maybe, somebody else has to be this was for a while, instead of me.
