Madagascar Wiki
Episode Page Guidelines

Introduction

In this document, you will find all the requirements for an episode page, as well as some guidelines for optional contents. This will ensure that all of our pages shall be uniformed and synchronised throughout the entire Wiki.

Compulsory Requirements

It is important that all episode pages must include enough information and content for users visiting the Wiki to read. Therefore, we must make sure that each and every of our episode pages contains at least the below elements:

1. Must be titled with the episode title as stated by the officials
2. If from All Hail King Julien, must be categorised as "All Hail King Julien Episodes"
3. If from The Penguins of Madagascar, must be categorised as "The Penguins of Madagascar Episodes"
4. Must be placed under a faction category
5. Must include all required contents listed in the Contents chapter

Contents:

1. Tab* (General* / Photos* / Trivia** / Quotes** / Transcript** / Behind the Scenes / Lists / Other)
2. Horizontal line separator*
3. Infobox* (must include at least Name, Season, Episode, Image, Air Date, Previous Episode, and Next Episode)
4. Summary*
5. Plot*
6. Songs**

*= Required in all pages
** = Highly encouraged to be included in any pages if needed, but not compulsory

Content Guideline:

Tab

The tab section will consist of the Tab template, which can be found in most of the established episode pages. At least two tabs must be placed, which are General (main page), and Photos, all linking to their respective subpages (except for General which shall be linked to the main page).

To create the tab template, you will have to insert the below code in Source Mode at the start of the page.

```
{{Tabs|
{{Tabs#|{{BASEPAGENAME}}|General}}
{{Tabs#|{{BASEPAGENAME}}/Photos|Photos}}
{{Tabs#|{{BASEPAGENAME}}/Trivia|Trivia}}
{{Tabs#|{{BASEPAGENAME}}/Quotes|Quotes}}
{{Tabs#|{{BASEPAGENAME}}/Transcript|Transcript}}
}}
```

Replace the hash (#) to its respective code number, which is '1' for the page you are editing, and '2' for the other pages. You can look at an established page for reference on the tab.

Horizontal line separator

In Source Mode, below the Tabs template that either you just placed or has already existed, add the code "`----`". Once you've done that you should successfully have added a horizontal line separator to separate the Tabs section from the contents below.

Infobox

In Visual Editor, click the Insert button on the menu, and from the dropdown selection pane, select Infobox. A menu will pop up listing all the Infoboxes in the Wiki, and you will have to select the one named "MW-Episode Infobox". After that, you may fill in all necessary information in the infobox and click "Apply Changes" once you're done.

Summary

The summary section will consist of a brief summary of the episode. If there is an official summary provided by the officials, it is highly encouraged to use the official summary.

Plot

The plot section is a bit more lenient as there are not many guidelines to what should and what should not be written. Basically, the only thing needed in this section is the plot of the episode. The other thing you need is the title, which will be in the "Heading" format and writes "Plot".

Songs

If the episode contains one or more songs, this section may be added. List out the songs featured in the episode in a bullet list, with the singer's name beside the song name. For example:

- [Song Title] – [Song Singer]

If the singer is unknown then that part can be skipped.

Like the Plot section, this section also requires a title in the "Heading" format, writing "Songs".
