## Events Page Guidelines

---

### Introduction

In this document, you will find all the requirements for an events page, as well as some guidelines for optional contents. This will ensure that all of our pages shall be uniformed and synchronised throughout the entire Wiki.

### Compulsory Requirements

It is important that all events pages must include enough information and content for users visiting the Wiki to read. Therefore, we must make sure that each and every of our events pages contains at least the below elements:

1. Must be titled with the event title (if there is no official title, you may come up with one)
2. Must include all required contents listed in the Contents chapter

### Contents:

1. Tab\* (General\* / Photos\* / Trivia\*\* / Other)
2. Horizontal line separator\*
3. Infobox\* (must include at least Name, and any other important sections)
4. Introduction\*
5. Content\*

\* = Required in all pages

\*\* = Highly encouraged to be included in any pages if needed, but not compulsory

### Content Guideline:

#### Tab

The tab section will consist of the Tab template, which can be found in both of the current series pages. At least two tabs must be placed, which are General (main page), and Photos, all linking to their respective subpages (except for General which shall be linked to the main page).

To create the tab template, you will have to insert the below code in Source Mode at the start of the page.

```
{{Tabs|
{{Tabs#|{{BASEPAGENAME}}|General}}
{{Tabs#|{{BASEPAGENAME}}/Photos|Photos}}
{{Tabs#|{{BASEPAGENAME}}/Trivia|Trivia}}
}}
```

Replace the hash (#) to its respective code number, which is '1' for the page you are editing, and '2' for the other pages. You can look at an established page for reference on the tab.

## Horizontal line separator

In Source Mode, below the Tabs template that either you just placed or has already existed, add the code "-----". Once you've done that you should successfully have added a horizontal line separator to separate the Tabs section from the contents below.

## Infobox

In Visual Editor, click the Insert button on the menu, and from the dropdown selection pane, select Infobox. A menu will pop up listing all the Infoboxes in the Wiki. Pick one which applies which has the prefix "MW-Event". If there are none which apply to the type of event you're writing about, then you may contact an administrator to get an event infobox for the page. After that, you may fill in all necessary information in the infobox and click "Apply Changes" once you're done.

## Introduction

The Introduction section must begin with one sentence, that goes as so:

*/event name/* was a [type of event & description] that happened (during / between) (episode number(s) / film(s)). [short summary].

  = Insert content  
( ) = Pick one that applies

## Content

The content of Event pages depends on the type of event and the event itself, and there's no specific guidelines for this section.

However, it is highly encouraged to separate the content by the different moments of the events. You can refer to established pages such as Butterfly War for reference.
