CONSERVE THE ENVIRONMENT HEAL TANZANIA BY SOLAR COOKERS

© Sperancea K. Gabone

OBJECTIVE:

To HEAL Tanzania Environment by Solar Cookers.

REASONS:

- The forests and Natural beauty of our Environment is messed up either by cutting trees for charcoal or firewood. -Pollution of air by burning of kerosine, one hardly tell the dangers and effects. -Tanzania as a country can barewitness of suffering she has undergone due to the problems related to such. E.g the destruction of environment which forced by the people cutting trees an destroy the natural beauty of our environment lead to lack of enough rainfal especially to our country Tanzania

SOLAR COOKER:

The cooker helps time of preparing food.
A person can cook food while doing other works.

PROCEDURES:

- Put your cooker outside where it can get sun rays, for about 6minutes for warm up, then put your prepared food on the cooker; cooking time: Min.-1hour - max.4hours food is ready to be used.

CUTTING OF TREES:

The result of cutting trees eventually leads to air pollution causing diseases, the ugly view of the land, Lack of enough rainfall, land degradation and hence poor economical to Tanzanian people and country as whole.

ADVANTAGE OF USING SOLAR COOKERS:

Tanzanian after introduction of solar cookers, they smile showing satisfication and the full of life, joy due good environmental conservation.

SOLUTION:

Therefore talk about the scarcity of rain and diseases related to the pollution of air, the ugly view of the land, Tanzania now finds rest to realise that all these problems can be brought to an end by SOLAR COOKERS. This introduction is the only solution of conserving the environment hence heal Tanzania in general.
